43.11 WAYPOINTS FOR NEUTRALISATION ZONES.

**DN** (Start neutralization zone): This waypoint is used to define the beginning of a neutralization zone within a Selective Section. It also may define the beginning of a speed control zone equivalent to a DZ (see also CCRSR Art. 37).

**FN** (Finish neutralization zone): This waypoint is used to define the end of the neutralization zone within a Selection Section. It also may define the end of a speed control zone equivalent to a FZ.

45.1.1 One Selective Section per Stage may be split into parts, separated by one or more neutralization and/or Transfer Zones.

45.2.1 The start of the next part of the Selective Section will be given at a target start time, determined by adding the arrival time for the previous part of the Selective Section to a fixed time for the neutralization or Transfer Zone, i.e. the arrival time (to the second) of the previous part of the Selective Section + fixed time = target start time of the following part of the Selective Section.

45.2.2 A maximum allowed time will be indicated on the Time card for a Selective Section. If the Selective Section is in parts, maximum allowed times will be indicated for each part. If a maximum allowed time is exceeded by a competitor and noted, the crew will not be allowed to start the following part and the Clerk of the Course will apply the Penalty as per Appendix I. The competitor may drive to the last TC of the Stage and will be able to take the start of the next Stage.

45.2.6 If a crew does not stop at the start line, or leaves the start line before the start signal is given, this will be considered a false start (Art. 42.5).

45.2.7 In any case, a crew which does not start one part of the Selective Section will not be allowed to start the following part of the Stage.

45.2.8 At the end of the Selective Section, the result for the Selective Section will be calculated by subtracting the START (DSS) time, the neutralization time (Art. 45.1.2) and the fixed transfer zone time(s) (Art. 45.2.1) from the FINISH (ASS) time.

**55.1.2 NAT Stopping at the official remote refueling zones (in neutralization Zone) in a Selective Section is compulsory for all competitors of NATIONAL event, regardless of whether they use or not the refueling facilities.**

## Behaviour in Speed Limit

### 1. Heading to Speed Limit

- Start of Speed Limit (DZ) is displayed as NEXT Waypoint in the Navigational part of the screen.

### 2. Entering of Speed Limit - 50 km/h, deacceleration tolerance distance - **NO PENALTIES**

- The validation of the DZ Waypoint marks the beginning of the Speed Limit Zone. An Orange Frame around the screen will appear and the speed limit, in this case 50 km/h, will be displayed instead of the Global Speed Limit. The orange background with black figures shows that you are in the deacceleration tolerance distance where no penalties for speeding will be applied. See FIA Sporting Regulations. *Driving speed is below the speed limit - Diagram 1*

Driving Speed **BELOW** Speed Limit

Diagram 1

- If the current speed is higher than the speed limit, the Current Speed Indicator is flashing with red background and white figures, combined with warning sound.

**Driving speed is above the speed limit - Diagram 2**

Diagram 2

### 3. Inside of Speed Limit - 50 km/h, past deacceleration tolerance distance - **PENALTIES APPLY**

- Past deacceleration tolerance distance penalties will be applied if the driving speed is higher than the speed limit. The speed limit indicator changes its background from orange to white and the color of the figures from black to red. The orange frame around the screen stays on. Warning sounds become more frequent when driving speed comes closer to speed limit.

**Driving speed is below speed limit - Diagram 3**

Diagram 3

- If the driving speed is higher than the speed limit, the Driving Speed Indicator is flashing with red background and white figures, combined with warning sound.

See Diagram 5

Diagram 5

## Warning for Global Speed Limit

- If the driving speed is higher than the Global Speed Limit, the Current Speed Indicator is flashing with red background and white figures, combined with warning sound.

## Warning for Safety Waypoint - Danger Level 3
